This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

CATALOGUE OF GREEK COINS.

SICILY.

EDITED BY

REGINALD STUART POOLE.

SYRACUSE, BY BARCLAY V. HEAD.

THE OTHER CITIES OF SICILY, BY PERCY GARDNER, M.A.

SICULO-PUNIC CLASS AND LIPARA, BY THE EDITOR.

LONDON:
PRINTED BY ORDER OF THE TRUSTEES.
1876.

PREFACE.

In the following Catalogue, the coins of each city have been classified under the Periods to which they have appeared to belong, from various indications afforded by a comparison of their style of art with that of other Sicilian coins of which the dates have been ascertained.

It has, however, been thought unadvisable to furnish precise dates for the commencement and the termination of the several Periods, which have been accordingly specified in general terms as (i.) Of Archaic Art. (ii.) Of Transition. (iii.) Of Finest Art. (iv.) Of Decline; early. (v.) Of Decline; late. (vi.) Of Roman Dominion. Under each city, except Syracuse, the coins of the three metals are separately described; in many instances it has been, therefore, necessary to repeat the chronological arrangement.

The coins of Syracuse, on account of the extent and importance of the series, have been classified in a manner somewhat more elaborate than that which has been thought best in the case of the other cities. The order adopted by Mr. B. V. Head, in his "Chronological Sequence of the Coins of Syracuse," London, 8vo, 1874, has been here selected as being that which is now generally accepted by Numismatists, and references to Mr. Head's plates representing the Museum examples have been added to the descriptions of all such types as are not engraved in the present work.

Throughout the Syracusan Series the division into Periods as specified above has been retained, while at the same time a more precise method of classification according to dates has been found practicable; so that, in the case of Syracuse, the several Periods are made to coincide with the following dates:—

(i.) Period of Archaic Art, from the latter part of 6th cent.—B.C. 479.
(ii.) Period of Transition, from B.C. 479—412.
(iii.) Period of Finest Art, from B.C. 412—345.
(iv.) Period of Decline; early, from B.C. 345—275.
(v.) Period of Decline; late, from B.C. 275—212.
(vi.) Period of Roman Dominion, from B.C. 212.

These dates may doubtless be taken as indicating in a general manner the duration of the Periods of Art throughout the Island, with the single exception of that of the Roman Dominion, which over the greater part of Sicily began at an earlier date than at Syracuse.

For the attributions of several coins, among which may be mentioned those of Piacus, Mytistratus, &c., I am indebted to Dr. Imhoof-Blumer, of Winterthur, Switzerland.

In the Siculo-Punic class only such coins have been included as bear either the names or the types of Sicilian cities, the remainder being too closely connected with the purely Carthaginian series to be separated from it with advantage. In like manner the coins of the islands, those of Lipara and Sardinia excepted, have been relegated to the Punic Series.

In the case of Lipara it has been considered inexpedient to follow the same system of classification as has been adopted in Sicily, the coins of that island not affording sufficient indications of the epochs at which they were issued; they have, therefore, been simply divided into classes according to the types which they bear,

the sequence of these classes being generally, though probably not in every case, chronological.

The metal of each coin and its size is stated in inches and tenths. The weight is given in English grains of all gold and silver coins, and of all copper coins bearing marks of value. Tables for converting grains into grammes, and inches into millimètres as well as into the measures of Mionnet's Scale, are placed at the end of the volume (pp. 290–292).

REGINALD STUART POOLE.
